

Why FocusOne?

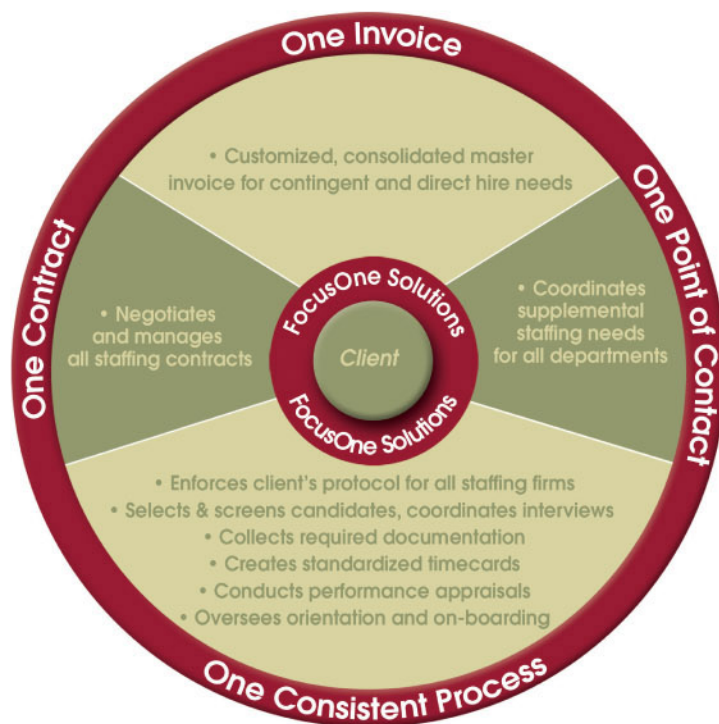

Simplified Staffing. Powerful Results.

FocusOne Solutions® is a leading provider of customized vendor management programs designed to simplify the staffing process by helping you seamlessly source and manage your contingent and direct hire needs.

Our personalized service, combined with our web-based software tool, will improve the way you procure staff and manage your workforce demands, while allowing you to maintain full control over your operations.

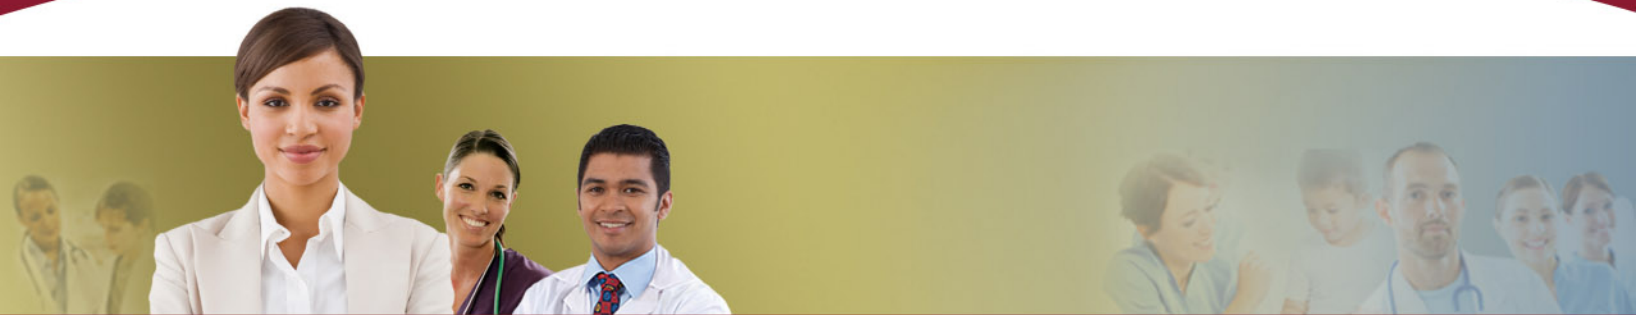

The Benefits of FocusOne:

- » Manages open positions and staffing firms through a single point of contact
- » Broadens the pool of available candidates
- » Increases fill rates and response time
- » Controls overall staffing spend by increasing operational efficiencies, improving tracking, and better managing/negotiating rate structures
- » Ensures quality, service delivery, and ongoing management of credential compliance
- » Provides an experienced Operations Consultant along with a technical service team behind the scenes

At FocusOne, we listen, we help you strategize, and we tailor all solutions to you - because your facility isn't identical to another and neither is your staffing model.

Developed *for* Staffing Professionals *by* Staffing Professionals.

Performance. That's what it's all about. At FocusOne Solutions®, we help organizations achieve higher levels of performance through seamless sourcing, delivery, and management of your workforce.

With our user-friendly, web-based software tool, FocusOne Connect, you'll increase your operating efficiencies, reduce time-to-fill, and achieve cost savings. Plus, you'll enhance communication between your organization and approved staffing firms, as well as gain immediate access to each candidate's status.

Software Features:

- Online resource acquisition
- Consistent candidate profiles
- Credential archival to ensure compliance
- Dashboard with action items displayed by user
- Right-to-hire controls and workflow delegation
- Real-time reporting
- Scalable solution for any size organization
- Fast and easy implementation with no hardware installation
